

Data Space Discovery Day

October 19, 2023 | Vienna

How to build a community

Lisa Kolar & Marcos Moschovidis
DIO

Ligthning before the thunder.

How to build a community

Your community & communication platform

#ThePowerOfCollaboration = Success

We promote the Austrian & EU data economy and the optimized use of data technologies.

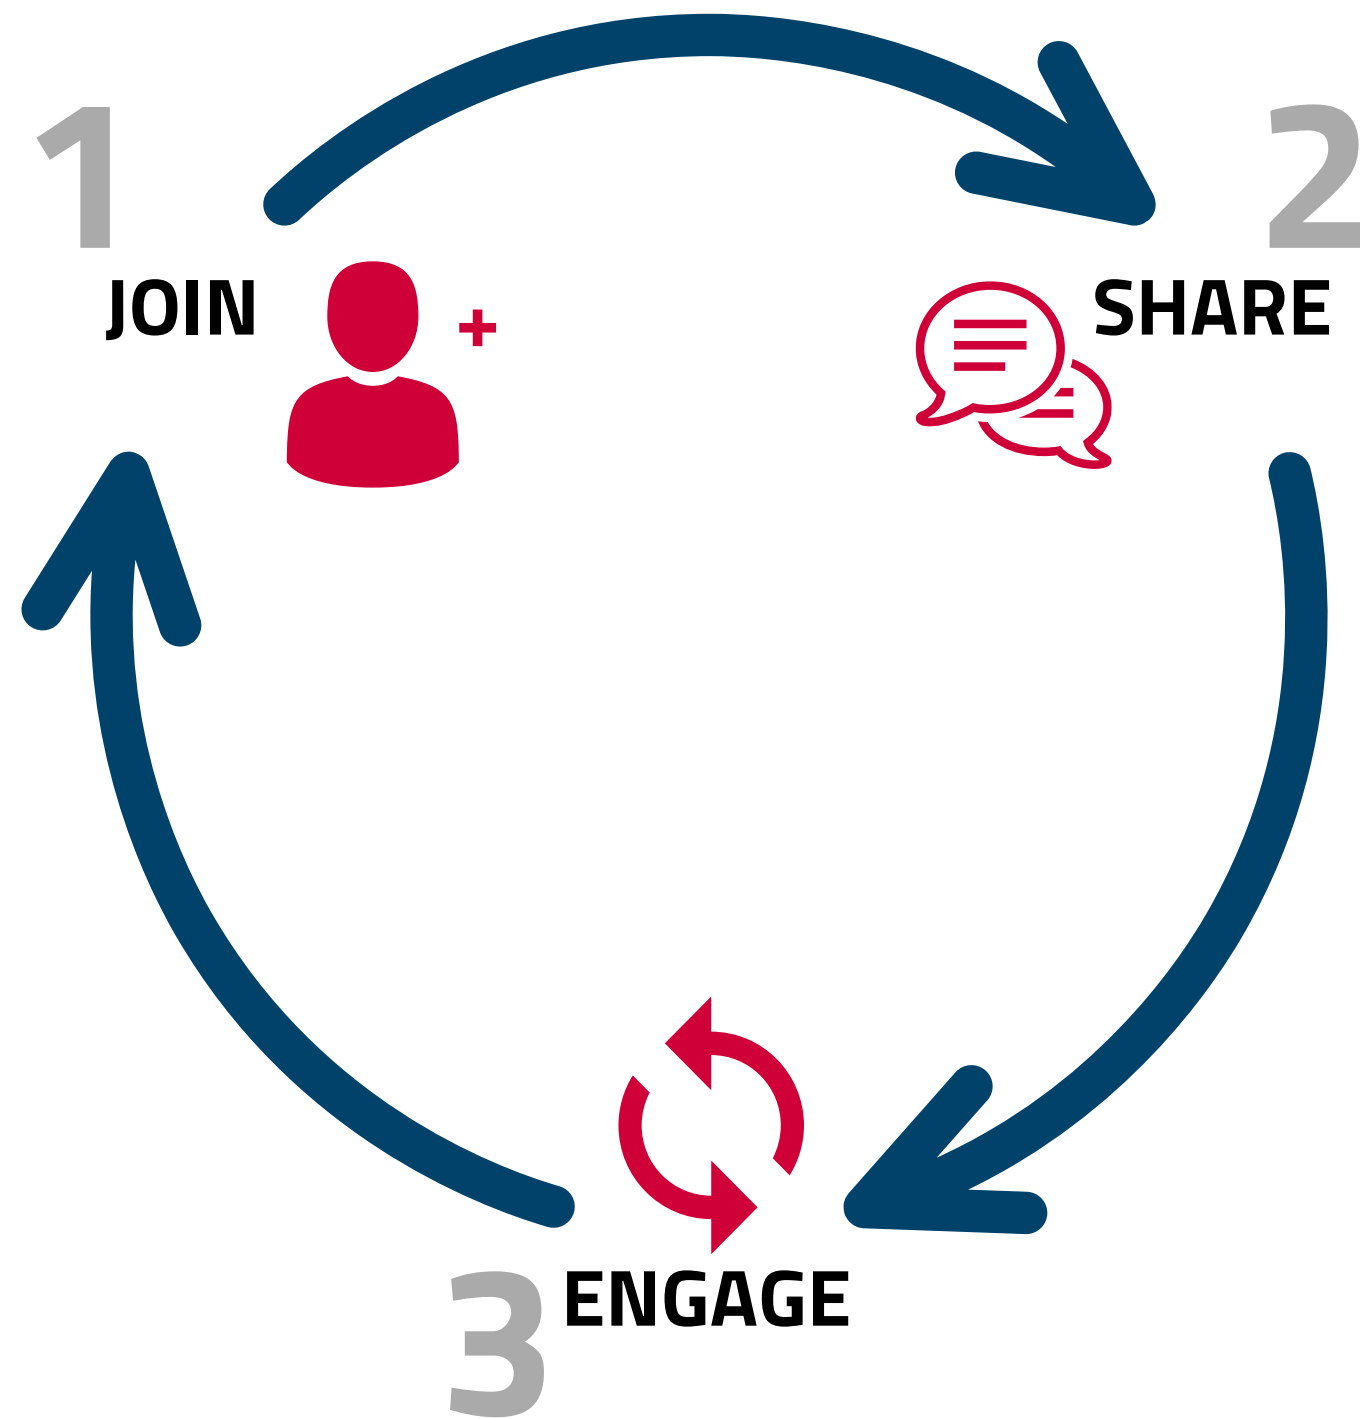

We initiate the change of perspective:

- from an exchange concept to a trading concept,
- from data exchange to multilateral data sharing and trading.

We aim to implement European values, such as data autonomy in the basic technical design and in various regulatory provisions.

TOGETHER, we are working to create an open and transparent data ecosystem that unlocks business value potential in the EU.

By the community, for the community

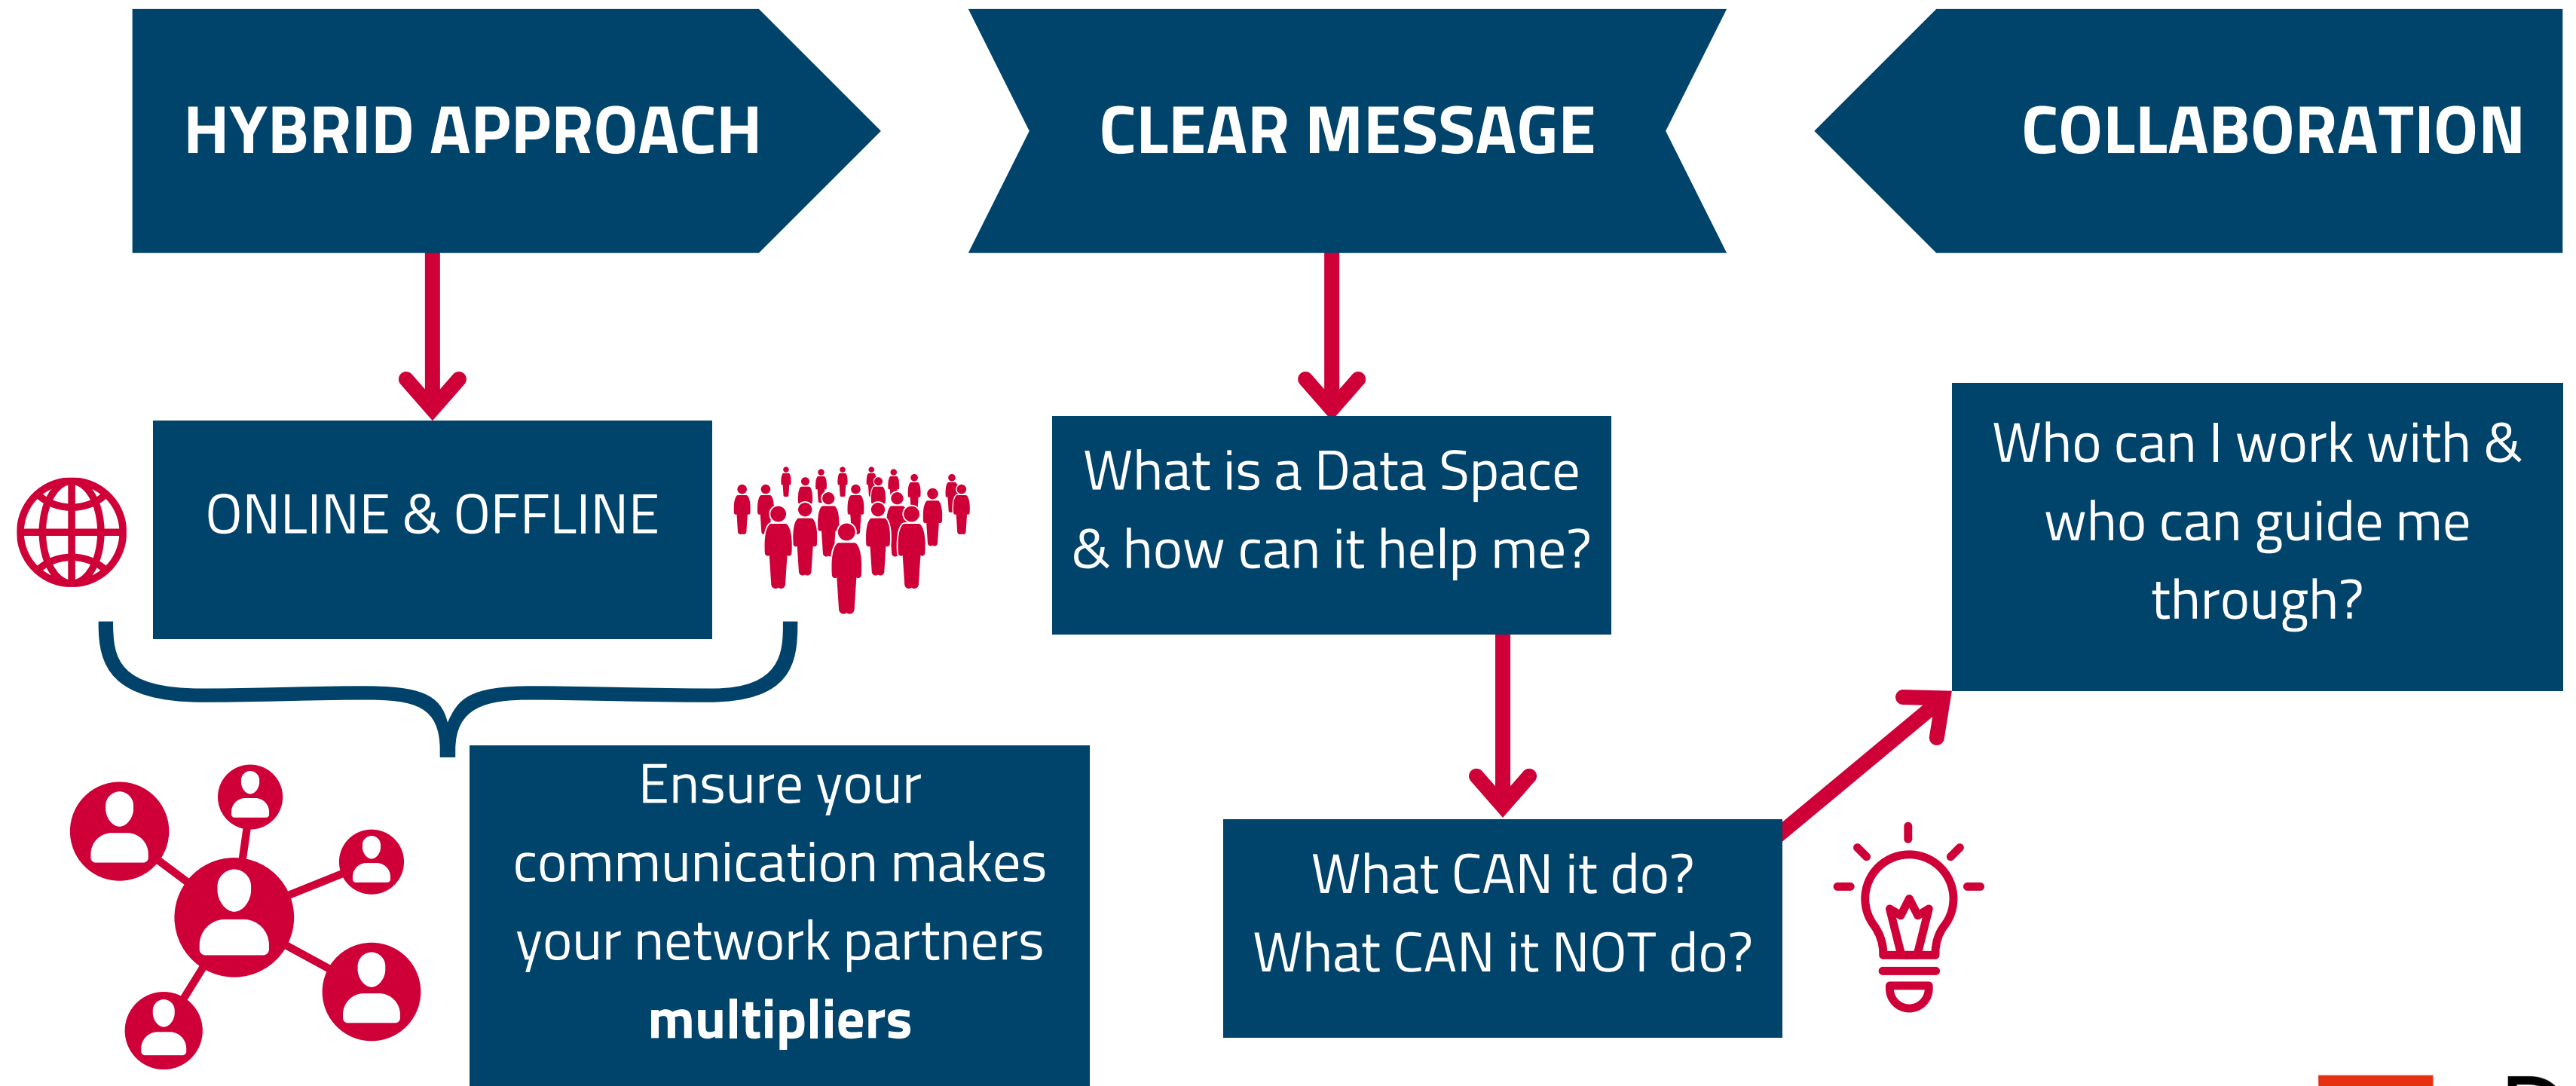

The community is already here.

The data is already here.

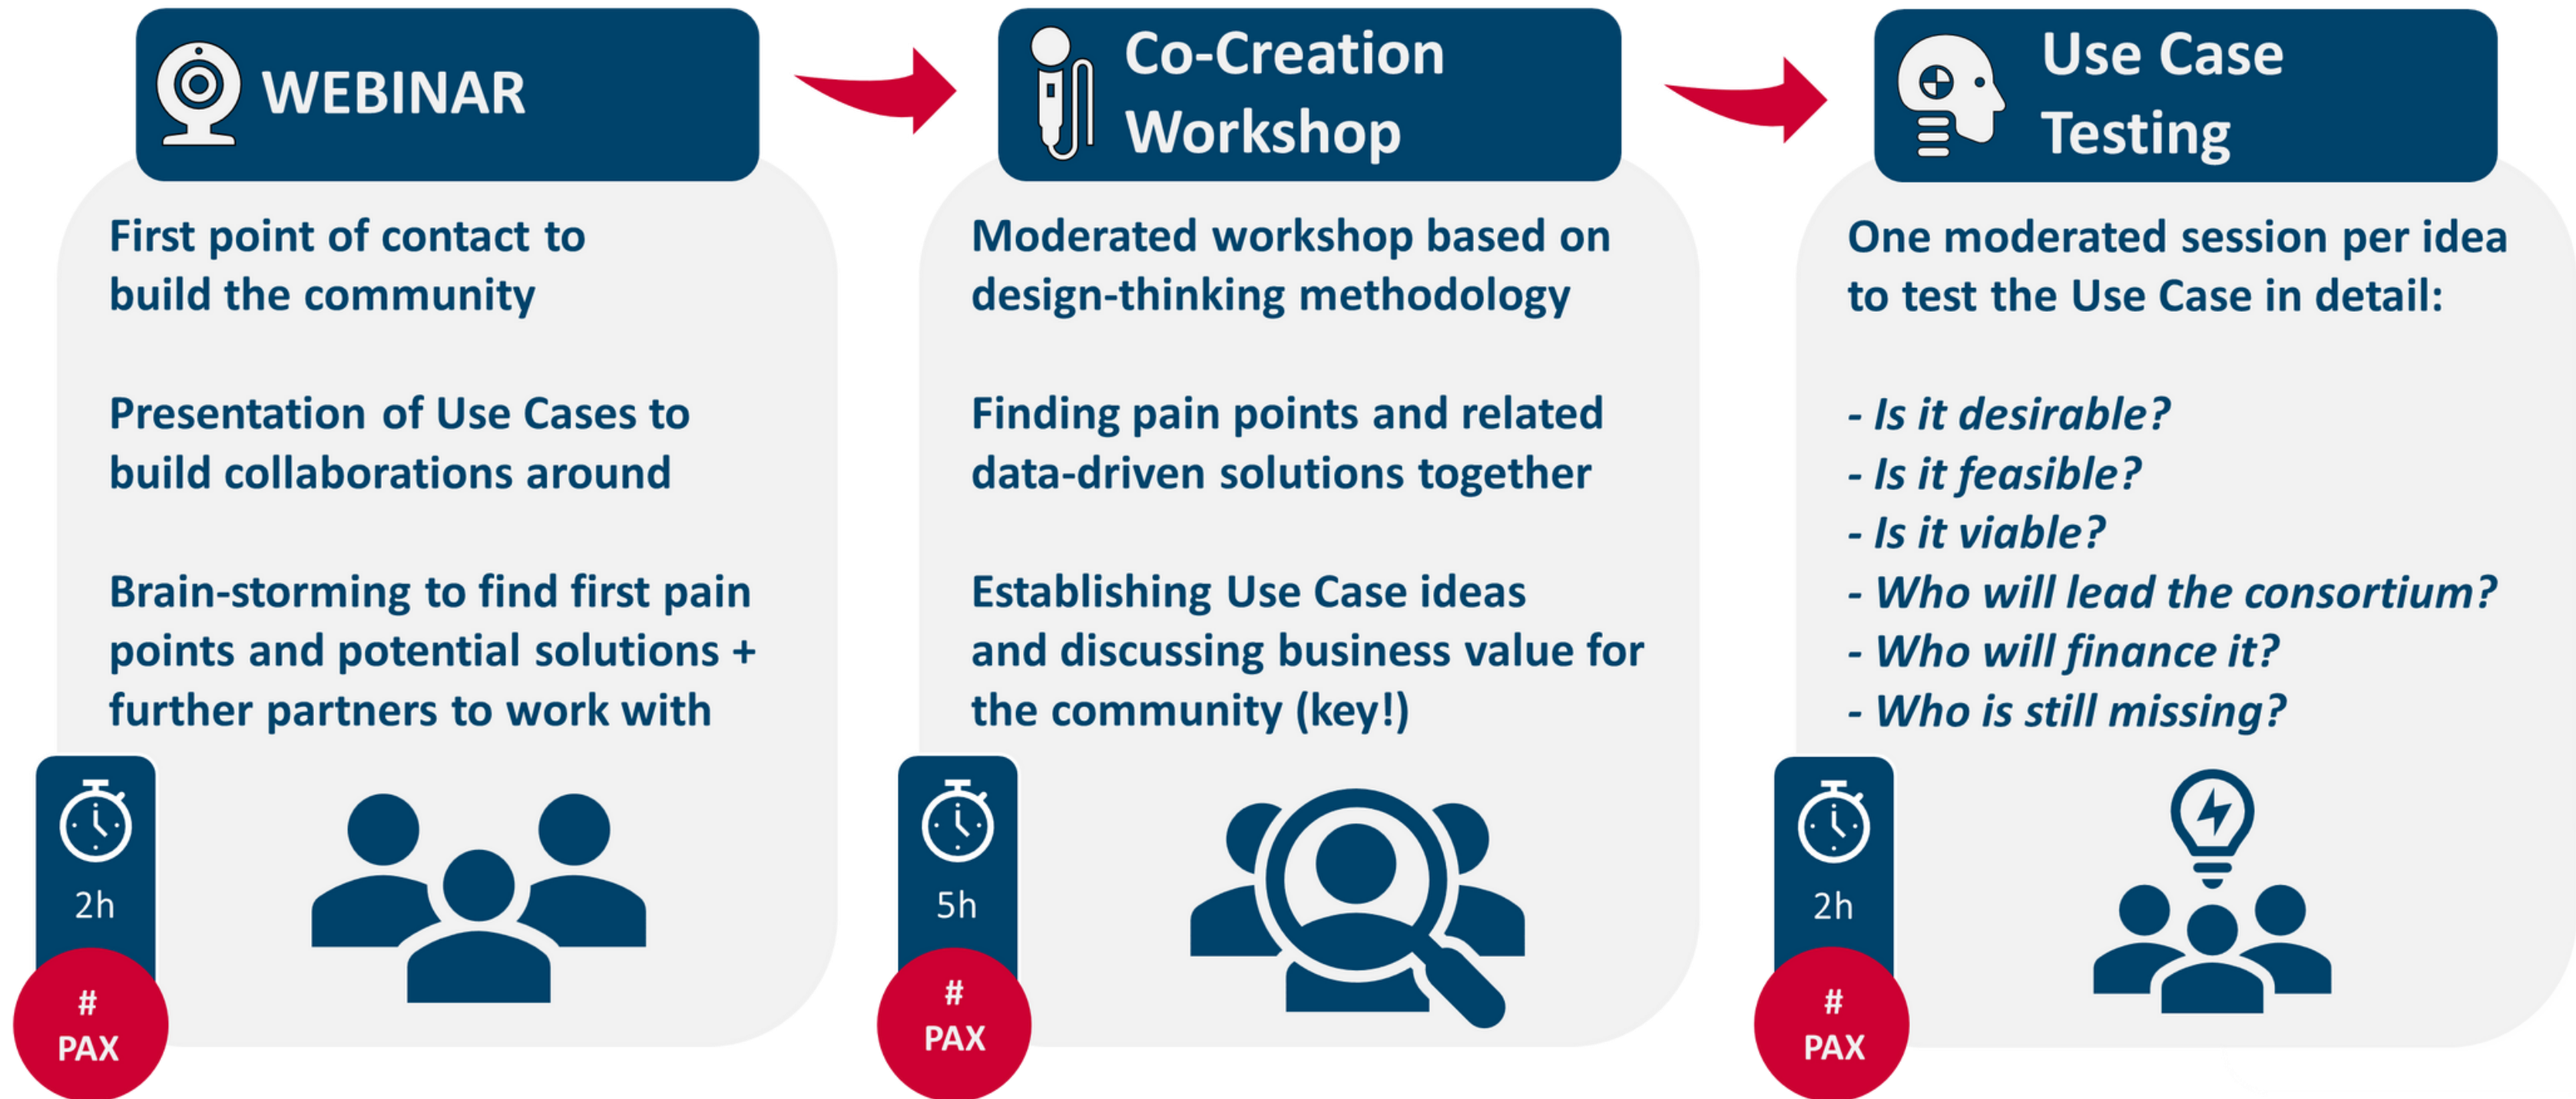

Maybe they don't know it yet - so make sure they find out!

- DIO is a purpose-driven stakeholder platform with ~ 200 members
- Data Service Ecosystem, built by and for the community

Communication is key

Collaboration - build a data space

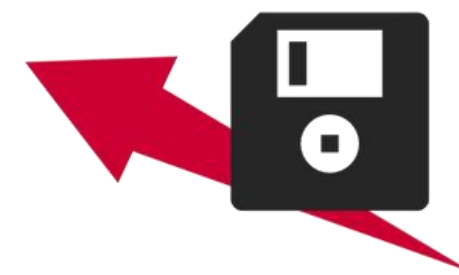

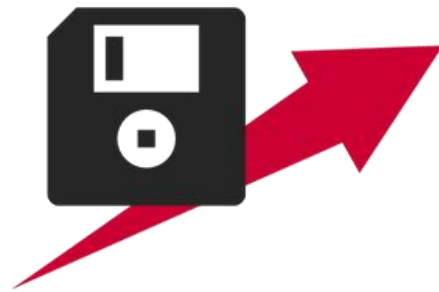

Sharing is caring

EACH PARTICIPANT IS AN AMBASSADOR OF THE DATA SPACE

My Organisation

My Community

**Feel the thunder.
Become part of the DIO community.**
